 - Property Charts (pp. 78-82)
 - Restraining/Protection Order Charts (pp. 83-87)
 - Small Claim Charts (pp. 88-92)

Executive Summary of Charts

Background: The charts were created by assessing two reports from the North Dakota Supreme Court's IT Department. One report focused on attorney appearances (attorney report) and the other on district court cases (case report).

Attorney Report: The attorney report provided the county, case type, case number, filing date, and bar ID number for all cases filed with an attorney of record from 2018 to 2023. The attorney report does not capture cases where no attorney appeared in a case. A case will populate for every appearance made; therefore, the attorney report outlines the number of appearances made by attorneys (a case would populate six times if six attorneys appeared in a single case). Cases are only generated in the report if an attorney of record is entered in the docket for a party, interested person, or a third party. Some counties are not consistent with listing attorneys of record for when the State is a party; therefore, the attorney report may underrepresent criminal cases and other case types where the State is frequently a party, such as child support or juvenile cases. The attorney report does not capture appearances in reopened cases. Therefore, the attorney report will heavily underrepresent family law cases since those cases are frequently reopened. The attorney report also does not include municipal counts. The attorney report was used to generate the charts on pages 11-20.

Case Report: The case report provided the county, case number, case type, filing date, party count, defendant count, number of self-represented parties, and the number of attorneys appearing in a case. All case types were grouped into categories, and certain categories have been excluded when preparing charts (see p. 21 of materials). Attorneys are only counted if an attorney of record is entered in a docket for a party (attorneys of real parties of interest, attorneys of interested persons, and guardian ad litem are not counted). All cases where the State is a party has at least one attorney appearing for the State. The case report only generates cases that were filed in 2018-2023; therefore, it does not capture reopened cases. Like the attorney report, the case report will underrepresent cases that are frequently reopened, such as family law cases. There are certain nuances with how a case is categorized as lawyer v. pro se party depending on grouping. For example, the conservatorship & guardianship group will be marked lawyer v. pro se party if a respondent contests the conservatorship or conservatorship and is self-represented. A similar rule applies to the probate, trusts & estates group. The case report was used to generate the charts on pages 22-101.

County Population By Year (2018-2023):

- Description: Provides population data for each county from 2018 to 2023, along with a trend rate. The shading in the county column is based on county population for 2023. The red-shaded counties are those with a population of less than 5,000 residents. The darker shade of red, the less populated the county.

White-shaded counties have a population between 5,000-10,000. Counties with blue shading have above 10,000 residents with the darker shades indicating a higher population. The shading system for the county column is used in many charts. The shading in the trend column is based on county trends from 2018 to 2023. Green shaded cells indicate counties with growing populations, while red shaded cells indicate decreasing county populations. The yellow shaded cell indicate a static population.

- **Trend Assessment:** Most counties show a consistent population growth trend, with McKenzie (1.09) and Williams (1.07) leading. A few counties like Oliver and Golden Valley show slight population declines. Generally, more urban counties have increasing populations while more rural counties trend toward a decreasing population, except Billings and Slope counties, which are the least populated.

Population Per County (2024):

- **Description:** Lists the number of attorneys per county as of April 2024 and the number of attorneys per 1,000 residents. The attorney's location is based on the business address found on the Court's website.
- **Trend Assessment:** High attorney density is in urban counties like Burleigh (4.70) and Cass (2.75). Burleigh County is a high outlier for attorney concentration. Several rural counties have very low or zero attorney presence, indicating potential access to justice issues. North Dakota has fewer attorneys per 1,000 residents than most bordering states, excluding South Dakota, which may have a ratio of 1.94 attorneys per 1,000 residents. The national average is 3.86 attorneys for every 1,000 residents; however, the District of Columbia and New York state substantially increase the national average and are outliers. An average benchmark for number of attorneys per 1,000 residents is around 2.0 or 3.0, depending on demographics, legal needs, and legal infrastructure. Only Burleigh, Cass, Grand Forks, and Ramsey counties exceed the 2.0 ratio.

No. Appearances Per County by Year (2018-2023):

- **Description:** Number of court appearances per county each year from 2018 to 2023, including average and trend. Counties that have an increase in appearance are shaded green in the trend column while decreases are shaded red.
- **Trend Assessment:** Counties like McKenzie show a significant decrease in appearances (50.43 to 25.25), whereas Ramsey and Williams show increasing trends, indicating varying demand for court services. Trends for increasing or decreasing the number of appearances do not correlate with population.

Total Appearance Rate Per 100 Residents (2018-2023):

- **Description:** Total court appearances per 100 residents for each county annually. Appearances include criminal and civil proceedings. The chart is filtered by average. The 2018-2023 and average columns are shaded based on whether a

county is above or below the state average for their respective column. The trend column is based on the county row.

- **Trend Assessment:** A general decrease in court appearance rates per 100 residents across most counties, with some fluctuations. Logan, Mountrail, Emmons, Benson, and McIntosh counties are exceptions that trend upward.

Attorney Appearances By Year:

- **Description:** Breakdown of attorneys' caseload categories from 2018 to 2023, including those with more than 20 cases. The top chart shows the number of attorneys who appear in court from 2018 to 2023 and categorizes those attorneys by caseload.
- **Trend Assessment:** A decline in the total number of appearances but an increase in attorneys with higher caseloads, indicating fewer attorneys are handling more cases. In 2023, there were only 1,249 attorneys who appeared in court, of those, only 508 attorneys had a caseload with more than 20 cases. The number of attorneys that file one to five cases a year will likely continue to decrease.

No. Attorneys Who Take Certain Percentage of Cases Per County (2018-2023):

- **Description:** Lists the number of attorneys who handle different percentages of the county's cases. Potentially high-risk counties are shaded white. Appearances include civil and criminal.
- **Trend Assessment:** High concentration of cases among a few attorneys in several counties, with certain counties showing potential high-risk due to attorney workload. Higher populated counties are less reliant on one attorney to obtain legal services. Criminal appearances may be misrepresenting which counties rely on one attorney. The number of high-risk counties slowly increased, with more attorneys taking on larger shares of cases.

Attorneys With 50%+ of Cases Per County:

- **Description:** Identifies attorneys who handled over 50% of the cases in their respective counties from 2018 to 2023.
- **Trend Assessment:** Persistent issue with a small number of attorneys handling disproportionately high caseloads, posing risks for access to justice. All attorneys identified are state attorneys and may not be reflective of civil needs.

Case Type and Groupings: The list explains which case types have been grouped together for the charts provided on pages 35-101. It also shows which case types have been removed from the analysis.

Civil Filing Rate Per 100 Residents (2018-2023):

- **Description:** Civil filing rates per 100 residents for each county annually. The 2018-2023 columns are shaded based on whether the county was .5 above or below the yearly average. Counties above the average for that year are shaded

green, those .5 below are shaded red, and those falling in between are shaded yellow. The trend column is shaded based on whether the county has an increase in civil filing rates per 100 residents (green) or a decrease (red).

- Trend Assessment: Generally, more populated counties file more civil cases per 100 residents than lower populated counties. Most counties have seen a decrease in civil filing rates since 2018.

Criminal Filing Rate Per 100 Residents (2018-2023):

- Description: Criminal filing rates per 100 residents for each county annually.
- Trend Assessment: Similar variability as civil filings, with notable declines in some counties, indicating changes in criminal activity or law enforcement practices. McIntosh and Logan counties have nearly doubled their criminal filing rate per 100 residents since 2018.

Party Demographic Charts:

- Description: Charts from pages 22-101 show percentages for whether a case involves all pro se parties, no pro se parties, or a pro se party against a lawyer. There are charts for civil, criminal, and civil and criminal cases. The shading system is similar to the filing rate charts. The charts from pages 35-101 are broken down by groups.
- Trend Assessment: Generally, civil cases involving all pro se parties do not follow population density. Medium-sized counties and very low populated counties have more cases with both parties represented in civil cases while higher populated counties have a higher concentration of cases with an attorney against a pro se party in civil cases. Less populated counties are less likely to have defendants represented by an attorney in criminal proceedings.

County Population By Year							
County	2018	2019	2020	2021	2022	2023	Trend
