### Definitions:

**Assets** – Everything owned by either spouse, whether owned jointly or individually. Assets include, but aren't limited to, real property, cars, furniture, bank accounts, jewelry, life insurance policies, businesses, and retirement plans.

**Date of Valuation** – The date the Fair Market Value (FMV) was established.

**Debts** (also called Liabilities) – Everything owed by either spouse, whether owed jointly or individually. Debts include, but aren't limited to, mortgage, credit cards, student loans and car loans.

**Equitable Distribution** (also called Equitable Division) – Marital property and debt is divided equitably (fairly) in a divorce. Equitable distribution doesn't mean equal distribution.

**Equity** – Fair Market Value (FMV) of the asset, real property, or personal property, minus the debt connected to the asset, real property or personal property.

**Fair Market Value (FMV), or Market Value** – The price at which the property would sell.

**Marital Property** – All of the assets and debts owned by either spouse, whether owned or owed jointly or individually.

**Net Value** – See Equity.

**Valuation Date** – This is the date on which the fair market value of property is established. This is also the date the total amount owed on a debt or liability is established. When you divorce, you need to figure out the valuation date for your property and debt.

See [N.D.C.C. Section 14-05-24\(1\)](#) for the valuation dates for property and debt in a divorce.

In general, the valuation date is the date to which **both spouses agree**. If the **spouses can't agree**, the valuation date is 60 days before the initially scheduled trial date.

There may be property to which federal law applies. If so, the valuation date is the date required by the federal law(s) that applies to the property.
