Subject: lawyers

It is my belief that everyone has the right to representation and if they have a lawyer that is willing to stand by the in a court of law in our country they have a right to that defense. Do not limit the lawyers who can represent those that have been arrested during this difficult time of our current history. Stand for what is right, give back to our fellow citizens the dignity of being apart of this nation, allow the water protectors who stood up in peaceful protect to bring in lawyers who can understand and represent their individual case. Read the files collect information. Take a stand of justice that should be equal to all.
