Subject: Yes let out of state attorneys help!

I sincerely hope you let out of state attorneys help defend the water protectors in their trials. What is happening in ND is just wrong, any help these people can get they should be allowed to accept. Please do the right thing and let these people have proper legal aid, they are only trying to protect their homes, water and the earth. This should not be punishable. The government and big companies not abiding by the treaties put in place should be the ones on trial.

Thank you for your time,
Angel
