Motion For Extension

East Central District
Cass County Case No: 2021-DM-01260
Supreme Court Case No: 20230019

I, Nicholas A. Otten, am submitting a motion for extension for the deadline for the appellant brief. The reason for this is that I have recently received advice from legal services. This advice completely changed the format and content of the appellant brief I was working on prior to this conversation. A 12-14 day extension would be sufficient in order to bring the most accurate and truthful information and reasoning to the court for the courts considerations.

I am also going to be requesting for an oral argument in front of the court in order to properly state my case. My reasoning for this is that I believe that my brief, while informative, I believe that it will not convey the full extent of what types of issues that came up prior to and during the proceeding that is being appealed.

I am ultimately submitting a motion for these things to bring the most accurate and important information to courts attention.
